🏆 Exempted

Professional Summary

Mobile Application Developer with deep engineering expertise across **Native Android (Kotlin & Jetpack Compose)**, **Cross-Platform (Flutter & Dart)**, and **Native iOS (Swift & UIKit)**. Proficient in architecting scalable, clean, and robust mobile systems using **Clean Architecture (MVI, MVVM, BLoC)**, reactive state management (Coroutines, Flow, RxJava), local databases (Room, CoreData, SQLite), networking (Retrofit, Apollo GraphQL), and **Google Gemini Multimodal AI SDK** integration. Solid foundation in CI/CD automation and containerization.

Education

- 9-Month Professional Diploma

Information Technology Institute (ITI)

Oct 2025 – Aug 2026

• Track: Mobile Applications Development (Native Android, iOS & Cross-Platform)

• Core Focus: Jetpack Compose, Swift & SwiftUI, Flutter, Clean Architecture, Kotlin Coroutines, Unit/Integration Testing.
- B.Sc. in Computer and Systems Engineering

Zagazig University

Sep 2020 – May 2025

• Grade: Very Good with honors

• Graduation Project: Taier 📄, A flight booking mobile app enabling users to search routes, select travel classes, and process online payments. (Grade: Excellent)

Professional Traineeships & Experience

- Mobile Developer Trainee (Flutter)

National Telecommunication Institute (NTI)

Mar 2025 – Jun 2025

• Engineered responsive cross-platform Flutter applications applying BLoC/Cubit state management, Clean Architecture, and Dio networking with interceptors.
- DevOps Engineer Trainee

Digital Egypt Pioneers Initiative (DEPI)

Apr 2024 – Oct 2024

• Configured automated CI/CD deployment pipelines using Jenkins, Docker, Kubernetes, and Azure Terraform.
- Android Developer Trainee

Orange Digital Center Egypt

Sep 2022

• Gained intensive practical experience in native Android UI/UX, Java/Kotlin architecture, and component lifecycles.

Featured Mobile Projects (1 / 2)

1. LinguaQuest — AI-Powered Language Learning

📄, Kotlin MVI & Clean Architecture

• Features: Built the flagship real-world scavenger hunt app utilizing CameraX and Gemini Multimodal AI for live object recognition, interactive AI roleplay conversations, pronunciation scoring, offline Room DB caching.

• Tech Stack: Kotlin, Jetpack Compose, Navigation 3, Hilt, CameraX, Gemini AI SDK, Room DB, Firebase (Auth, FCM).
2. Qafilah — Next-Gen AI Mobile Commerce

📄, Kotlin Compose & Shopify GraphQL

• Features: Integrated Shopify Storefront API via Apollo GraphQL, Paymob card/wallet payment checkout, real-time cloud wishlist sync, multi-account profile switching, and an n8n Agentic AI shopping assistant.

• Tech Stack: Kotlin, Jetpack Compose, Apollo GraphQL, Shopify API, Koin, Paymob SDK, Room DB, n8n Agentic AI.

Featured Mobile Projects (2 / 2)

3. Taier — Smart Flight Booking Mobile App [🔗](#), Flutter BLoC & Clean Architecture

- **Features:** Graduation project (Grade: Excellent). Engineered flight search engine across multi-city routes, dynamic seat tier selection, Stripe payment gateway integration, and conversational AI chatbot concierge.
- **Tech Stack:** Flutter, Dart, BLoC, Dio, Stripe SDK, GetIt, Flutter Secure Storage, REST APIs.

4. Pip-Boy Weather Station [🔗](#), Kotlin MVVM & WorkManager Alerts

- **Features:** Built localized (EN/AR) retro-futuristic weather app with real-time conditions, interactive Google Maps radar/location picking, automated background alert notifications via WorkManager, and offline Room DB caching.
- **Tech Stack:** Kotlin, Jetpack Compose, Retrofit, Room DB, WorkManager, Koin, Google Maps SDK, Coroutines & Flow.

5. League Lens (Sports Tracker) [🔗](#), Native iOS Swift & CoreData

- **Features:** Developed native iOS sports tracking application displaying live league standings, fixtures, team rosters, offline favorites persistence with CoreData, and skeleton loading animations with Lottie.
- **Tech Stack:** Swift, UIKit, MVP Architecture, Alamofire, CoreData, SkeletonView, SDWebImage, Lottie.

Technical Skills Inventory

Android Native

Jetpack Compose, Kotlin Coroutines & StateFlow, Navigation 3 / Component, CameraX, Room DB, Retrofit, Apollo GraphQL, Hilt, Koin, WorkManager, Services & Broadcast Receivers, Google Maps SDK, Glide, RxJava 3, DataStore, XML Layouts, Unit & Integration Testing (JUnit, MockK).

Cross-Platform & iOS Native

Flutter: Dart, BLoC, Cubit, GetIt, Dio Networking, Responsive UI, Localization (EN/AR), Secure Storage, sqflite, Kotlin Multiplatform (KMP).

iOS: Swift, UIKit, SwiftUI, CoreData, Alamofire, GCD, AutoLayout.

Databases, APIs & Backend

Room DB, SQLite, CoreData, Firebase Suite (Auth, Firestore, FCM, Cloud Storage, Remote Config), Apollo GraphQL, Shopify Storefront API, Retrofit, RESTful APIs, Ktor Server (Kotlin).

Programming Languages

Kotlin, Java, Dart, Swift, Objective-C, C++, Python, JavaScript, SQL.

Architectures & Patterns

Clean Architecture, MVI (Model-View-Intent), MVVM, MVP, MVC, SOLID Principles, Repository Pattern, Dependency Injection, Reactive Programming (RxJava, RxSwift).

AI, Payment SDKs & DevOps

Google Gemini AI SDK, Agentic AI (n8n, Groq), Paymob & Stripe Payment SDKs, Docker, Jenkins CI/CD, Git, GitHub Actions, Linux, Gradle (Kotlin DSL), Android Studio, Xcode, Postman.

Certifications & Credentials

- **DEPI DevOps Engineer:** Digital Egypt Pioneers Initiative (DEPI) — CI/CD, Docker, Jenkins, Kubernetes, Azure Terraform (Feb 2025).
- **Mobile Application Developer:** National Telecommunication Institute (NTI) — Flutter, Dart, BLoC, Clean Architecture (Sep 2025).
- **Flutter & Firebase Master:** Hussain Mostafa — Authentication, Firestore, FCM, Push Notifications (Aug 2025).
- **Android Developer:** Orange Digital Center Egypt (ODC) — Native Android, Kotlin & Java fundamentals (Sep 2022).

Languages

Arabic: Native | **English:** Excellent
